Cascade TEK Vacuum Oven

MODELS TVO-1 & TVO-2

- Temperature to 300°C
- All Stainless Steel interior
- Watlow 24-step programmable controller
- Independent oven-temperature control
- Special galvanized sheath heaters
- Optimized conductive heat transfer
- Inert gas purging control
- Glass viewing door
- Vacuum gauge 0-30" Hg
- Tested to 10 microns
- 12-month warranty

CASCADETEK OVENS

DUNIWAY PART #	DESCRIPTION	PRICE	INTERIOR VOLUME	POWER	HEATER	SHELVES	WEIGHT POUNDS
TVO-1	Oven	Inquire	0.56 cu/ft	9 amps	1,000 w	3	68
TVO-2	Oven	Inquire	1.7 cu/ft	13 amps	1,500 w	3	148

Cascade TEK Vacuum Ovens are designed to meet the most critical constant temperature requirements of the industry. These ovens are ideally suited for drying, curing, sterilizing, life-testing and other applications requiring uniform & precise temperature and control.

These vacuum ovens have specially designed and positioned heating elements on all five sides. This provides for even heat conduction and elimination of hot spots. Cross flow ventilation and vacuum ports in the oven allow for introduction of inert gases while providing complete purging of vacuum vessel. All valves have Teflon® coated valve seats tested to 10 microns. A full view glass viewing door and vacuum gauge are also included for added versatility. The Cascade TEK vacuum oven has no peer.
